

# Sample Module

SkillsUSA ITS Tech Standards:

- 6.4.2 Implement software security measures for protecting systems against malware and viruses

Things you'll need:

Skillsusa user password: `skills` (lowercase s)

To open task manager, use: `Ctrl + Shift + Escape`

What you'll be doing:

Jeremy was trying to jailbreak his phone and accidentally downloaded files he shouldn't have. He doesn't remember what he downloaded, but now there is a message that pops up every 5 seconds. No matter what he does, he can't make the message stop.

Please keep in mind that you are working on someone else's computer; be sure to take care to not make the problem worse!

Scoring:

30 points - stopping the message from popping up every five seconds

70 points - permanently removing any files related to the virus
